NEWS RELEASE

25/03/2011

## Bureau Partner Programme Picks up Speed

ProcessFlows' Bureau Partners recently got together at Daytona in Milton Keynes for a Bureau event hosted by ProcessFlows; in conjunction with OpenText, Kodak, Hyland and Readsoft.

ProcessFlows provides technology, services and outsourcing solutions that help scanning Bureaux to increase profitability, win more business and generate incremental revenues from within their existing customer base, without any risk or further investment.

The Alchemy Document Management roadmap was showcased, along with the new Kodak i5000 series scanner with the latest Capture PRO software. Document Management in the cloud was presented as an alternative, pay-as-you-go option to on-premise Document Management solutions.

Attendees then went out onto the track to test their driving skills against each other and representatives from both ProcessFlows and their technology partners.

Prizes were presented to the top three delegate and staff winners.

Maria Costas Awad, Sales & Marketing Director from London and Bristol based Bureau, ImageStor, said; *"I would like to thank everyone at ProcessFlows for a super day out. It was good to see that things are 'back on track' so to speak by having access to such a variety of solutions to suit the bureaux and the client's needs. A very constructive day!"*
