NEWS RELEASE

28/02/2011

## **ProcessFlows Awarded Platinum Partner Status by Hyland Software**

Winchester based ProcessFlows, suppliers of technology solutions that streamline the flow of business information around an organisation, is one of only nine Hyland channel partners globally to have achieved this highest level status.

Hyland Software is an independent Enterprise Content Management (ECM) software vendor. Its OnBase Document Management solution turns manual, time consuming, paper based processing into an automated activity. ProcessFlows has been an OnBase partner since 2002.

Platinum partner status is awarded to partners demonstrating steady sales growth. Graham Robinson, ProcessFlows' OnBase Solution Sales Consultant, accepted the award at the recent Hyland annual Team OnBase partner conference in Tampa, Florida.

*Graham said; "We are honoured to reach this milestone in our relationship with Hyland. The award is the result of our confidence in OnBase to deliver what it promises, combined with the perseverance, focus and commercial astuteness of our sales team to convey solutions that organisations really need and want."*

OnBase can really make a difference; helping organisations to save money through increased efficiencies. Utilising the OnBase platform, ProcessFlows is able to build cost-effective applications for customers, which complement and leverage further functionality from their existing line of business systems. The result is increased productivity, improved customer service and reduced operating costs.

ProcessFlows has helped over 1,200 clients; including those in local government, healthcare and the commercial sector, automate the everyday labour intensive workplace processes that

slow up the processing of accounts payable, timesheets, contract renewals and HR documentation etc.

**Editors notes:**

Further information about ProcessFlows and OnBase can be found at
